

# **Events Under Developers Club**

## **Bug Hunt:-**

Bug-hunting, also known as bug bounty hunting or ethical hacking, is a dynamic and crucial aspect of cybersecurity. It involves skilled individuals, often referred to as bug hunters or ethical hackers, actively searching for vulnerabilities and weaknesses in computer systems, networks, web applications, and software. In these competitions, participants are tasked with identifying and exploiting security vulnerabilities in various systems, applications, and networks. Bug-hunting competitions are not just about finding flaws but solving puzzles, deciphering code, and outsmarting security measures. Participants use a combination of technical expertise, critical thinking, and problem-solving skills to uncover vulnerabilities that may have eluded traditional security measures.

## **Guidelines of Bug Hunt -**

1. Individual participation
2. It will be a max 2-hour event.
3. It will be conducted on an online platform and details will be mailed to participants.
4. All participants are requested to bring their laptops.
5. Winners will be on the basis of time of submission.
6. If we have 2 winners at the same time then one with less number of attempts will be the winner.
7. It solely depends on the participant to submit code in whichever language, they are free, but the original code given in the question may vary but the processing of the code will be given in the question.

# DevQuest -

DevQuest is an event where individuals, with a background in programming, software development, design and other related fields, collaborate intensively on creative projects, often within a specific time frame. Our DevQuest serves to foster innovation, promoting teamwork and providing a platform for learning creative things and skill development. Participants work together to create tangible projects and push themselves to step out of the boundaries of technology and problem-solving. This program emphasizes the participant for creating a functional and innovative prototype within the given time constraint. It provides a great opportunity for networking. People get to connect with like-minded individuals and potential programmers. Overall DevQuest is a dynamic event that fosters creativity, collaboration and rapid prototyping within a condensed time frame. It is an exciting avenue for individuals passionate about technology and innovation.

## Guidelines of DevQuest-

1. A maximum of 5 members are allowed in a team and a minimum of 2.
2. Winners are selected based on each Theme and One overall theme-based winner will be there .
3. Themes details will be provided on the website
4. It will be a 2-day event.
5. All participants are requested to bring their own laptops.
6. Day 1 and **till 12:00 pm of Day 2** will be development time and after that presentation on day 2 would begin.
7. Feedback given by mentors will be important for the evaluation
8. Results will be solely dependent on the discretion of the judges.
9. There will be a PPT shortlisting criteria before the final event
10. Max length of the PPT will be 4 pages and a prototype of the PPT will be given on the website.
